INFORMATION FOR AUTHORS

The IEEE TRANSACTIONS ON AUTOMATION SCIENCE AND ENGINEERING is published quarterly. Automation plays an increasingly important role in the global economy and in our daily lives. Engineers strive to combine automated devices with mathematical and organizational tools to create complex systems for a rapidly expanding range of applications and human activities. To meet these challenges, the IEEE TRANSACTIONS ON AUTOMATION SCIENCE AND ENGINEERING (T-ASE) publishes foundational research on Automation: Scientific methods and technologies that improve efficiency, productivity, quality, and reliability, specifically for methods, machines, and systems operating in structured environments over long periods, and the explicit structuring of environments. Its coverage goes beyond Automation's roots in mass production and includes many new application areas, such as Biotechnology, pharmaceutical systems, and health care; Home, service, and retail; Construction, transportation, and security; Manufacturing, maintenance, and supply chains; and Food handling and processing. We welcome the abstractions, algorithms, theories, methodologies, models, systems, and case studies covering topics related to robots and intelligent machines/systems, as well as topics at the Operational/Enterprise levels such as System Modeling, Analysis, Performance Evaluation; Planning, Scheduling, Coordination; Risk Management; Supply Chain Management.

T-ASE integrates knowledge across disciplines and industries and, to facilitate the transfer of research into practice, requests that each article include a 100–300 word Note to Practitioners (NtP). Writing a good NtP is a challenge. Rather than simply restating the Abstract or Introduction in less technical terms, authors should step back and describe without jargon how their results could be applied or extended to practical problems, and discuss the potential and limitations of the work, as though they were addressing a colleague from industry. An example NtP can be found in the T-ASE home page http://www.ieee-ras.org/tase.

This TRANSACTIONS publishes Regular as well as Communication Items. Communication Items are a class of short manuscripts that are subject to an expedited review process. Appropriate items include, but are not limited to, rebuttals or counterexamples of previously published articles, or preliminary results of significant current research of wide interest. Normally, members of the Editorial Board review these submissions internally, although they may request outside review when appropriate. Manuscripts of a tutorial or review nature are welcome, and authors of such articles are advised to contact the Editor-in-Chief (EiC) in advance concerning probable interest. Papers describing specific implementations are encouraged, provided that they represent the best practice, that the topics are of general interest, and that their detailed characteristics and performance are included. Multipart articles will be published only if there is compelling rationale for a multipart treatment, and all parts of such submissions must be accepted for any part to be published.

The articles in this journal are peer reviewed in accordance with the requirements set forth in the IEEE PSPB Operations Manual (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-anonymous peer review process, where the identities of the reviewers are not known to the authors, but the reviewers know the identities of the authors. Articles will be screened for plagiarism before acceptance. Corresponding authors from low-income countries are eligible for waived or reduced open access APCs.

Ethical Issues

Manuscripts should be original, previously unpublished work not currently submitted to any other publication. It is the responsibility of the authors, not the IEEE, to determine whether disclosure of their material requires the prior consent of other parties and, if so, to obtain it. If authors make use of charts, photographs, or other graphical or textual material from previously published material, the authors are responsible for obtaining written permission to use the material in the manuscript.

IEEE defines plagiarism as the use of someone else's prior ideas, processes, results, or words without explicitly acknowledging the original author and source. Plagiarism in any form is unacceptable and is considered a serious breach of professional conduct, with potentially severe ethical and legal consequences. Self-plagiarism is also unethical. If authors have used their own previously published work(s) as a basis for a new submission, they are required to cite the previous work(s) and briefly indicate how the new submission offers substantively novel contributions beyond those of their previously published work(s).

Multiple submissions to different journals are unacceptable. This applies to the entire period in which an article is under T-ASE review. It is the responsibility of the authors to clearly spell out the differences of their submitted articles with similar content, and any common part should be clearly indicated. If in doubt, please contact the EiC.

Procedures for Submission and Review of Manuscripts

T-ASE article submission and review are through ScholarOne Manuscripts at http://mc.manuscriptcentral.com/t-ase. Instructions are provided on-line. English language editing services can help refine the language of your article and reduce the risk of rejection without review. IEEE authors are eligible for discounts at several language editing services; visit the IEEE Author Center to learn more. Please note these services are fee-based and do not guarantee acceptance.

Submission of Multimedia Material

Please consider including multimedia with your article so that others can build on your results. This can include datasets (in .xls or .xlsx format), presentations (in .pdf or .ppt or .pptx format), and illustrative videos (see Submission of Multimedia Material for formats): https://www.ieee-ras.org/publications/t-ase/information-for-authors-t-ase. Please follow IEEE general guidelines for the preparation and submission of multimedia, including the format, description of content, user requirements, the way this material should be referenced to in the body of the article, etc., see the IEEE Author Center at https://journals.ieeeauthorcenter.ieee.org/create-your-ieee-journal-article/prepare-supplementary-materials/preparing-multimedia-materials/. In addition, T-ASE requires that such an article should be self-contained, i.e., fully readable and understandable independently from the multimedia material; and only freely available media players (e.g., QuickTime, RealPlayer, Microsoft Windows Media Player) should be required by users. Multimedia materials should be submitted with a ReadMe file describing the minimum requirements for a user and contain a brief description of the multimedia content. The multimedia material will be reviewed together with the submitted article. Once an article and its associated multimedia material is accepted, the latter will be available on the T-ASE page within IEEEXplore (http://ieeexplore.ieee.org/xpl/RecentIssue.jsp?punumber=8856), back to back with the PDF file of the paper.

Graphical Abstract

This journal accepts graphical abstracts and they must be peer reviewed. For more information about graphical abstracts and their specifications, please visit the following link: https://journals.ieeeauthorcenter.ieee.org/create-your-ieee-journal-article/prepare-supplementary-materials/developing-a-graphical-abstract/.

Copyright

It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers; and to facilitate the appropriate reuse of this material by others. To comply with U.S. copyright law, authors of accepted articles are required to complete an IEEE electronic copyright form (ECF) on ScholarOne Manuscripts when they submit their final package for publication. This form returns to authors and their employers full rights to reuse their material for their own purposes upon request.

ORCID

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. ORCID is a persistent unique identifier for researchers and functions similarly to an article's Digital Object Identifier (DOI). ORCIDs enable accurate attribution and improved discoverability of an author's published work. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal. To create an ORCID, please visit: https://orcid.org/register.

Style of Manuscript

Manuscripts should be submitted in a double column format using an IEEE style file (downloadable from https://journals.ieeeauthorcenter.ieee.org/create-your-ieee-journal-article/authoring-tools-and-templates/ieee-article-templates/). Regular papers are limited to twelve (12) TRANSACTIONS pages, with mandatory page charges imposed on extra pages (see Page Charges below). Excessively long articles may be rejected without review. Uploaded information: A cover letter, an abstract (one paragraph and up to 200 words for Regular Papers and 50 words for Communications), a Note to Practitioners right after the abstract, keywords, and the type of paper (Regular or Communication Item).

For additional information on manuscript style requirements, please visit the following link: https://www.ieee-ras.org/publications/t-ase/information-for-authors-t-ase.

Open Access

This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted $2,495 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission.

Page Charges

A page charge form ($110/page) is sent to the authors of accepted papers with proofs, and the author is encouraged, whenever possible, to make a contribution to defray part of the publication cost. A mandatory overlength page charge is imposed on all regular papers whose length exceeds 12 TRANSACTIONS pages, including illustrations. This charge is $175 per page of each page over the first 12 pages based on the final typeset length and not on manuscript length, and is a prerequisite for publication. The same policy applies to communications exceeding 6 TRANSACTIONS pages.

Inquiries

Our home page is at http://www.ieee-ras.org/tase. All technical correspondence relating to publications should be sent to the EiC, Yu Sun, Department of Mechanical and Industrial Engineering, University of Toronto, Canada, email: tase.eic.sun@outlook.com. For administrative inquiries, please contact Editorial Assistant Rebecca Hytowitz, IEEE, Piscataway, NJ 08854 USA, Phone: 732-562-6070, T-ASE Office, e-mail: r.hytowitz@ieee.org.
